

- 6:58 [pathworld](#): hi David
- 6:59 [simmontemplar](#): greetings Molly, Agni, Harry, Path !! David and M. Ann !!
- 6:59 [Pro agnihridaya](#): Hello Simon!!!!
- 6:59 [simmontemplar](#): no more Crosby, Still and Nash ! ???
- 6:59 [piandjo](#): hi simmon. glad you are with us.
- 6:59 [Pro markroche](#): Hi Lab workers
- 6:59 [hawklady](#): hi path, welcome back, i missed you a lot
- 6:59 [simmontemplar](#): I am the glad one to be with you guys

» Hi George !

- 7:00 [piandjo](#): lab workers1 yes
  - 7:00 [silverdale](#): Hi Simmon! I miss our converdations!
  - [dosts](#): Hi Gang
  - [piandjo](#): Simmon, where are u in the planet tonite?
  - [auriah](#): hi everyone
  - [simmontemplar](#): hold on there ol'friend !! ...lots to talk
  - [auriah](#): hey path! welcome back!
  - [Pro agnihridaya](#): Hi!
  - [simmontemplar](#): In a city that is the MOTHER of the Bardos !!
  - [piandjo](#): MAs mike needs more volume
  - [mollymidway](#): yes, that is the weak mic, we're working on it
- » sounds good now
- [piandjo](#): great now ma
  - [susankester](#): hello this evening

- [Pro markroche](#): Piandjo the song was called Everybody wants a piece of God on the Beatless Together Again cd

- [simmontemplar](#): Hi Susan !

» Mark !

- [dosts](#): this one's dense

- [Pro markroche](#): Hi Simmon and All

- [mollymidway](#): ty mark

» it's a fun chapter

- [Pro agnihridaya](#): right opinion is only exceeded by understanding and divine illumination

- [lost\\_horizon](#): Good evening

- [auriah](#): hi lost

- [simmontemplar](#): Hi Au and Lost !

- [auriah](#): hi

- [piandjo](#): nice, agni

» thx mark

- [lost\\_horizon](#): Hi, Simmon

- [simmontemplar](#): I don't have a compass for these realm guys

- [dosts](#): was that the non phenomenal world?

- [pathworld](#): hi all

- [hawklady](#): hi path, welcome back, good to have you here

- [Pro markroche](#): Hi Pathworld

- [pathworld](#): ty good to be home

» feel ilke sh#t today still jet lagged I guess

- [simmontemplar](#): No clue !!

- [auriah](#): ralm?

» yes, i have clues

- [silverdale](#): realm

- [simmontemplar](#): thanks Silver

- [auriah](#): I think, for myself when i'm about to, or amcrossing, has crossed

» into a chamber

- [dosts](#): we were talking about that weird voice on the phone that disappeared

- [mollymidway](#): lol

- [lost horizon](#): I don't know if this applies.. I notice changes in mood and attitude. Can these correspond to moving into a different chamber?

- [piandjo](#): i seem to notice a change in tempo, a slowing down, that may stutter a little. a clue for me.

- [dosts](#): or maybe it was an access point we all missed

- [auriah](#): when i'm crossing I become extremely clumsy... drop things, movements get jerky. when crossed its more still and the quality of vision changes, more physical(bodily) antennae sensing

- [mollymidway](#): could be so!

- [lost horizon](#): (I am quite at sea with this material)

- [simmontemplar](#): Could David give an example and escenario of these traps in life ?

- [hawklady](#): great idea simmon

- [mollymidway](#): when the karmic wind is active, it may feel like a magnetic push and/or pull to move towards or away from something. it usually gets explained by the mind or emotions, rather than felt

- [simmontemplar](#): Thanks David !

- [dosts](#): what was it you smelled? do you remember?

» Moksha also smelled rubbing alcohol before she had one of her psychic seizures before her brain surgery

- [Pro markroche](#): found that explanation useful Molly, thanks
- [dosts](#): it was a sensation too
- [lost horizon](#): I have smelled smells that I knew had no external origin
- [dosts](#): or the FEELING of rubbing alcohol
- [mollymidway](#): yes
- [auriah](#): not nice!!!!
- [lost horizon](#): subtle... but definitely in the vicinity of that sense
- [dosts](#): doesn't EJ say in some book that 'real love requires great risk' ?
- [pathworld](#): ya maybe
- [Pro markroche](#): never thought of it tht way before David, but yes now that you mention it
- [mollymidway](#): yes, he does say that
- [lost horizon](#): I was always averse to risk.. which did me no good whatsoever lol
- [Pro markroche](#): seems like, almost by definition, when we are 'risking', we are going into uncharted territory of some sort
- [auriah](#): i'd be surprised if my named isn't written! LOL!
- [lost horizon](#): lol
- [auriah](#): i joked it wasn't nice for hime to write names,i know i'm on the list. lol
- [pathworld](#): lol
- [auriah](#): I always have dread before, and get clumsy as the body seems to try to keep me from going there
- [lost horizon](#): never occurred to me clumsiness could be a defense mechanism.. I know someone that might apply to
- [mollymidway](#): clumsiness also occurs in highly electromagnetically charged areas

- [piandjo](#): outstanding explanation , George
  - [auriah](#): yet I can't seem to stop myself from catapulting myself head first into trouble (adventures). lol
- » Once there, everything stills and is calm, serene.
- [mollymidway](#): even if we are relaxed, we may feel it sometimes in places...dropping things, or dishes suddenly exploding
  - [auriah](#): yes, true molly
- » that too
- Your message was not sent because you are sending messages too quickly.
  - [auriah](#): that too
  - [mollymidway](#): it's a good sign
  - [dosts](#): that's what happens with the Beacon training
- » slowly and simply it allows one to transit from one space or dimension to another consciously
- [auriah](#): Hehehe... Oooooooh Sheeeeeeeeet
  - [mollymidway](#): radio waves are magical, and most people can understand them as such, if they've ever had one go off one station into the static
  - [auriah](#): its true about rememberint our mistakes and taking stock.
  - [mollymidway](#): while in the static--the body is uncertain, and probably could disappear--and then re-appear, at the next station...but it's more subtle, maybe? (regarding beacon training)
  - [dosts](#): definitely subtle yet it always works
  - [mollymidway](#): works for me, ever since i discovered radios of any type, including tv and now computers...especially loved the old dial-up static sound,
- » as the computer was logging into the ip address of the server (the station where stuff appears)
- [piph](#): this lifetime i remembered being stuck in a loop of dying from the same ailments and weaknesses, and taking care of them this life is making a difference
  - [hawklady](#): that's very insightful Piph

- [auriah](#): Yes Harry, I've had a similar experience, stuck in one for quite a while. but did not have access to respond. TY for your comment

- [mollymidway](#): the strange experiences are good signs of changes?

» the same old ailments are just reminders?

- [auriah](#): i think so. For me, yes.

- [dosts](#): the same experiences could either be teaching tools or things that cause the greatest wounds for us depending on how we use them

- [piandjo](#): thx piph

- [mollymidway](#): i like voyaging through static fields with my electromagnetic body field, but then i'm on anti-convulsants, so i should be quiet here, but i agree with piph

- [dosts](#):

- [piph](#): saw it very clearly over the past few yrs, yes infirmity, as David said.. and in the past in this life i have abandoned the body which isn't balanced enuf way to go

- [dosts](#): isn't it humility that's paving the way for that?

- [piph](#): while it was in dreams i see the signs and remembered the symptoms

» while it was in the waking state i came to comprehend what those signals truly are

- [hawklady](#): lovely Phip

- [piph](#): thnx all

- [mollymidway](#): remembering what we did three or games ago, or three or four lifetimes ago...

- [piph](#): i had nightmares from when i was a kid, and all the ones where i was dying i was spitting my teeth out into my hands..

» that was one, and it only became clear as I rebuilt the weakness, that this was what was occurring

» now i am unbuilding the weakness

- [mollymidway](#): smell and hearing and the sensing of vibrations are magnified greatly at death

- [Pro markroche](#): what currently being talked of seems to go back to the part about intuiting from before

» and as they say, intuition, use it or lose it, i.e., like any 'muscle' it needs to be exercised, or it atrophies.

- [piph](#): yes, and remember EJ said the Waking state is similar to the hypnotic state,, and bringing it into consciousness is voyaging in the machine of the habits

- [hawklady](#): Piph do you mean voyaging becomes the actual habit?

- [simmontemplar](#): I appologize to the sons and daughters of the Absolute, ...I must vow out for tonight; thanks for being here again and sharing such experiences.

- [mollymidway](#): thank you for coming Simmon!

- [hawklady](#): gn Simmon

- [silverdale](#): Adios Amigo - Simmon!

- [lost horizon](#): goodnight, Simmon.. good voyaging!

- [mollymidway](#): you make this place feel definitely wonderful, good night

- [simmontemplar](#): God noight all friends !!

- [piph](#): we had the credo not to exchange one habit for the other... and while it is the aim of the voyager not to collapse the voyage into the familiar>>

- [auriah](#): night simmon

- [piandjo](#): good nite , simmon. talk with you soon.

- [piph](#): the waking state does become a habit of the machine ,, also called stabilization in the waking state..>>

- [simmontemplar](#): You bet Harry ! bye Auriah !

- [susankester](#): bye simmon

- [lost horizon](#): Jacob

- [Pro markroche](#): goodnight Simmon

- [piph](#): while I can make no claims about that persistence .. i cannot say i know, for my subjective experience lies to me.
  - [mollymidway](#): you should say more about unbuilding weaknesses at some time...i would like to learn , ty piph
  - [Pro markroche](#): me too Piph
  - [piandjo](#): piph, not collapsing the voyage into the familiar-- exactly! a good thing to remember.
  - [piph](#): (sure molly... physician heal thysself...working away from keyboard)
- » (while listening)
- [mollymidway](#): cool
- » i don't feel free
- [auriah](#): me either molly
  - [piph](#): yes, David, while the other side of that ultimate paradox, is that when we resist awakening, we resist the very aim , of our claim of a will to work,, treacherous
  - [mollymidway](#): in a car i feel sort of free. it has doors, etc. in a body, it's tricky, because the body claims it's subtle voyagers as its own
  - [piph](#): we resist ourself - showing up
  - [lost horizon](#): it seems to me that this is show is one long clue... I find it hard to stay in the current space
  - [mollymidway](#): the machine, our work partner, has the advantage of its complexity, and it's tendency to want to find a groove, forever, if possible
  - [piph](#): interesting molly
  - [lost horizon](#): it wants equilibrium, then gets bored.. lol
  - [mollymidway](#): lol
  - [piph](#): hehe Lost
  - [piandjo](#): thanks again David and MA, and everyone for some really substantial material tonight.

- [silverdale](#): Thanks david and MA for guiding our discussions this evening!
- [mollymidway](#): thanks for coming everyone!
- [piph](#): thanks all
- [lost\\_horizon](#): it wants to live in a comfortable range of change.. not no change, not extreme change.. not too hot or too cold, but juuust right
- [Pro markroche](#): thanks David, Ma, and All
- [mollymidway](#): I love chapter 4!!
- [hawklady](#): Thanks Daivd, and MA and my fellow voyagers
- [lost\\_horizon](#): thank you all
- [mollymidway](#): good night
- [pathworld](#): Than you all and David.
- [lost\\_horizon](#): thanks, David and MA
- [susankester](#): goodnight
- [piph](#): great show, David really knows how to get to the heart of it
- [dosts](#): night yal
- [lost\\_horizon](#): g'night
- [auriah](#): night

» it went by really fast tonight

- [Pro markroche](#): I agree Piph, he does so exceptionally well, while simultaneously letting that 'heart' emerge from all of us
- [auriah](#): yes piph,i think so too
- [muspelspark3](#): good night
- [chaknz](#): good nite, this is Lupe
- [Pro markroche](#): rather than imposing it on us He's quite masterful at it

- [auriah](#): hey lupe!
- [Pro markroche](#): good nite Chaknz aka Lupe
