

Life in the Labyrinth - Chapter 5, part 1

- 6:53 [mollymidway](#): david says it would be helpful, piandjo » ty :)
- 6:54 [piandjo](#): ok
- 6:54 [mollymidway](#): welcome to Life in the Labyrinth
» with David Franco and Iven Lourie
- 6:54 [simmontemplar](#): Hello Everyone !! glad to be back w/you
» Molly, Harry !
- 6:55 [mollymidway](#): Chapter 5 - » Neural Network Projections
» hey Simmon, hiya
- 6:56 [simmontemplar](#): Hiiya' there !! Molly
» In computer sound is great
- [maccage2](#): greeting all
- [mollymidway](#): hi bonnie? » welcome Maccage2
- [maccage2](#): yezs » lol
- [auriah](#): Hi everyone!
- [mollymidway](#): hi auriah!
- [simmontemplar](#): Hi Au !
- [auriah](#): Hi Si! » hi molly
» hey did they change the monkry face?
- [hawklady](#): hello all
- [silverdale](#): Good evening One & All!
- [dosts](#): hi folks

- [smaragdigm](#): Hi :)
 - [susankester](#): hello
 - [auriah](#): hello
 - [simmontemplar](#): Hi Silver ! (PI)
 - [smaragdigm](#): Looks like!
 - [maccage2](#): looks like a 1 page or two off
 - [mollymidway](#): the monkey faces look like robo-monkeys now, but i think they work the same
 - [silverdale](#): Do we still have the same access code - 291472#?
 - [piandjo](#): yes,silver
 - [silverdale](#): I'm having trouble with my cell phone getting on » telephonically
 - [maccage2](#): because it takes more than the speed?
 - [simmontemplar](#): I think that is why is said that, although in the present we are already in the past
 - [mollymidway](#): i wonder if we have to disappear, and then reappear? at the speed of light things go still, and maybe blink out?
 - [hawklady](#): is that why sometimes we feel we have already been there, done that, had that conversion?
 - [Pro markroche](#): Hi everyOne, just got here
 - [hawklady](#): Hi mark
 - [piandjo](#): e.j.s thoughts on the brain and representational space are still current--the idea of internal maps
 - [mollymidway](#): by the time we notice that anything is happening at all, it's over, and we're re-scanning what we just did. which now we can't do » but can feel it » like new, or as deja vu?
- » hi mark
- [maccage2](#): a synapse is a structure that permits a neuron to pass an electrical or chemical signal to another cell

- [lost horizon](#): Good evening
 - [hawklady](#): yes deja vu
 - [maccage2](#): HI LH
 - [hawklady](#): hi LH
 - [Pro markroche](#): so there is an internal transformation and distillation in the brain of the signals from the world
 - This chat server is restarting for maintainance. You should reconnect in a few seconds.
 - [mollymidway](#): but can feel it » like new, or as deja vu?
 - [maccage2](#): a synapse is a structure that permits a neuron to pass an electrical or chemical signal to another cell
 - [lost horizon](#): wow, deja vu
 - [Pro markroche](#): and then on top of that we add our imaginary and ultimately arbitrary 'meaning' • And we're back.
 - [Pro markroche](#): hence , all phenomena is illusion
- » we live in imaginary internal constructs based on definitional limited perceptions of the world which are further limited by our 'filters'
- [mollymidway](#): a reasonably complex analog simulation some-thing-or-other?
 - [Pro markroche](#): lol
 - [lost horizon](#): I heard that our brain actually filters out 99% of impressions for our benefit
 - [Pro markroche](#): does the headset come with a microphone?
 - [lost horizon](#): lol
- » so we don't even get an accurate picture of the sense world - an illusion twice removed
- [Pro markroche](#): at least twice
 - [hawklady](#): yes, if we are lucky twice removed.
 - [lost horizon](#): I wish it came with a manual, Mark

- [Pro markroche](#): me too LH-lol
 - [mollymidway](#): yes, twice removed and upside down and then back upright, a lot of lag time, whole worlds pass by in between
 - [hawklady](#): You do LH, I lost it, sorry
 - [simmontemplar](#): "head set" stands then for...our own projections
 - [mollymidway](#): lol
 - And we're back.
 - [simmontemplar](#): ?
 - [lost_horizon](#): the manual?
 - [simmontemplar](#): or ...self reflection
 - [Pro markroche](#): i like that, Molly
 - [auriah](#): simmons question
 - [lost_horizon](#): that's what EJ's books are for.. perhaps we could have them included with future models...
 - [lornaallan](#): Is this archived?
 - [silverdale](#): Yes ... Simmon
- » We see the world in accordance with our heredity and personal experiences modified by cultural and societal modifiers ...
- [auriah](#): yes lorna
- » audio and chat log will be posted, and video on gorebagg
- [silverdale](#): This is the "headset that makes us an "involuntary slave" to our histoical personality ...
 - [lornaallan](#): Where?
 - [auriah](#): <http://www.wingsofchaos.com/life-in-the-labyrinth/chapter-05/>
 - [mollymidway](#): ty auriah

- [auriah](#): weekly chptr posts & comments

» yw

- [simmontemplar](#): Great pointers Markroche !!

» thank you

- 7:27 [mollymidway](#): it happens while we watch movies, we change headsets, or when we read vivid novels, or after shocks of various kinds, will knock us out

» of our usual headset

- 7:27 [Pro markroche](#): thx Simmon
- 7:27 [auriah](#): i agree molly! good pt
- 7:27 [mollymidway](#): it readjusts asap of course

» but it's fun while it lasts

- 7:28 [smaragdigm](#):
- 7:29 [silverdale](#): Transformation occurs when we voluntarily develop our essential self which is able to disarm the "headset" and enable us to see "multi-dimensionally" ...
- 7:29 [Pro markroche](#): that reminds me of the beginning of Creation Story Verbatim book where it says that if one adopts the bertillon, whatever that is, characteristics
- 7:30 [silverdale](#): Mark - you got cut off at characteristics ...
- 7:30 [Pro markroche](#): of the being one wants to invoke, in that case the Lord, then the invoked being has no choice but to respond
- 7:31 [maccage2](#): FYI right when David asked for question the system locked me out of the chat!?! "This chat server is restarting for maintainance. You should reconnect in a few seconds."
- 7:31 [mollymidway](#): it happened here, too
- 7:31 [silverdale](#): I went through that as well ..
- 7:31 [dosts](#): us 2

- 7:32 [Pro markroche](#): people do it naturally, the rapport, and recent science speaks of 'mirror neurons' which is that in close contact with others we literally start like, similar notes from diff instruments
- 7:32 [hawklady](#): me too, i had to refresh and wait for a couple of minutes
- 7:32 [Pro markroche](#): responding to each other in resoncance, we actually mirror the neurology of the other » *resonance
- 7:33 [maccage2](#): that was awesome1
- 7:33 [Pro markroche](#): thanks Silverdale
- 7:33 [mollymidway](#): you know, mark, i think that's a plus for keeping humanity alive and well, in spite of it all. that resonance thing is good
 - » it's a good recommendation for humans
- 7:34 [maccage2](#): Know Yourself
- 7:34 [Pro markroche](#): i agree Molly and i think like everything it is a 'neutral' factual process
 - » and it all depends on what we do with it
 - » @Maccage, so, the Cheshire Cat had the right advice all along
- 7:36 [maccage2](#):
- 7:37 [dosts](#): similar to yawning?
- 7:37 [Pro markroche](#): it is musical, physics-ical resonance
 - » there's a good book that adresses some of this stuff, called The Cerebellum by Masao Ito
- 7:39 [simmontemplar](#): Silver ...in Boston ?
- 7:39 [maccage2](#): what about eastern sciences . . . ie Chi, fung shui, etc. speak to effects of energy bodies
- 7:40 [Pro markroche](#): in the electrical body, wow, that seems to open it up to lots more possibilities
- 7:40 [hawklady](#): Yes Mark doesn't it; it's getting more interesting

- 7:40 [maccage2](#): also, modern physics speaks to this through Resonance
 - 7:40 [silverdale](#): Yes - Simmon - I'm here in Boston ... I couldn't get on the telephone because it wouldn't accept my access code ...
 - 7:41 [mollymidway](#): the effects of electrical bodies on other electrical bodies, not directly, but in the environmental soup of the overall electrical fields, seems like coincidences maybe between people, and events
 - 7:41 [maccage2](#): Induction theory/progress
 - 7:41 [Pro markroche](#): y Hawklady
 - 7:41 [silverdale](#): I like your comment Molly ...
 - 7:41 [mollymidway](#): ty silverdale
 - 7:41 [Pro markroche](#): me too Molly
- » it explains a lot
- 7:42 [lornaallan](#): There has to be a system beyond the ordinary brain/mind
 - 7:42 [simmontemplar](#): break our patterns
 - 7:43 [maccage2](#): energy waves are easily felt by animals . . .
 - 7:43 [dosts](#): contact high?
 - 7:43 [maccage2](#):
 - 7:43 [Pro markroche](#): or, in one of Claudes blogs, or somewhere, he spoke of being lots on edge immediately before 9/11 happened
- » am assuming that was 'electrical'
- 7:45 [mollymidway](#): it was a big shock, disrupted the time barriers?
 - 7:45 [auriah](#): sharon begley <http://neuroanthropology.net/2009/03/15/thinking-to-change-your-brain-sharon-begley-in-the-wsj/>
 - 7:47 [hawklady](#): paying attention to find that space
 - 7:48 [auriah](#): all the time

- 7:48 [hawklady](#): sweet AU
- 7:48 [auriah](#): i'm usually pointing it out, lol
- 7:49 [Pro markroche](#): all the time, embarrassing though it is--so much for our Sherlock Holmes skills-lol
- 7:50 [auriah](#): yeah, true mark, I have some days recently that i'm more watson. lol depends on the people i'm with too, or the 'headset'.
- 7:51 [Pro markroche](#): EJ did a Hapi hour this morning from 2:30 --6 and that somewhat unoccluded state seems wonderfully present
- 7:51 [lornaallan](#): Once I notice a plant or a fungus beside a trail, I see more of them. They were there all the time.
- 7:51 [maccage2](#): I find the ABD skills really help . . . dreamers stare, connecting to Essences rather than machines . . . peripherally I see much more
- 7:52 [mollymidway](#): brain-being bypass
- 7:52 [auriah](#): yes Macs, for sure the abd
- 7:52 [Pro markroche](#): *seemed
- 7:54 [auriah](#): i do that too lorna
- 7:55 [lost horizon](#): I like that one, Molly - a brain bypass
- 7:56 [mollymidway](#): it's in the book, a brain being bypass, bypassing the brain and seeing through the being directly
- 7:57 [hawklady](#): Harry, it was written exquisitely
- 7:57 [piandjo](#): thx hawklady
- 7:58 [silverdale](#): A thought provoking question Austin group - thanks ...
- 7:58 [hawklady](#): yes, the ending was quite thought provoking » is
- 7:59 [simmontemplar](#): I have done it and yes, I have after a little while found a different person (although the same) but a different picture out of my head set, which was the familiar perception of the person before the exercise
- 7:59 [lornaallan](#): Direct vision - the whole field of view in focus?

- 8:00 [muspelspark3](#): the "chronic" would be connected with maintaining "headset" I guess
- 8:00 [silverdale](#): For sure - Muspel -
- 8:00 [piph](#): you would see yourself or you would see nothing
- 8:00 [hawklady](#): it's a loaded gun
- 8:00 [mollymidway](#): y
- 8:01 [Pro markroche](#): the question grammatically is equally valid for both interpretations
- 8:01 [silverdale](#): We need to disarm the chronic in order to see clearly ...
- 8:01 [lornaallan](#): What is happening when people look really dead?
- 8:01 [maccage2](#): or would you see at all?
- 8:01 [hawklady](#): good point silver
- 8:02 [maccage2](#): ye old mirror . . .
- 8:03 [piph](#): ya mac
- 8:03 [silverdale](#): Thanks David and Ivan for guiding us along the Path this evening ...
- 8:03 [dosts](#): BTW Folks....Kathleen Dreier has a interview that's airing right after this show.
» it should be listed on her FB page
- 8:03 [simmontemplar](#): Thanks for the rich contributions Harry
- 8:03 [dosts](#): thanks all
- 8:03 [hawklady](#): great class, thanks you all; can't wait for the next one.
» Silver have a safe trip back
- 8:03 [maccage2](#): I'd like to talk more about these mark points . . . in relationship to the skill of getting to these spaces again
- 8:03 [susankester](#): Thank you for a great class
- 8:03 [lost_horizon](#): Thank you, David & Iven

» and all

- 8:03 [maccage2](#): Thank you all!
 - 8:04 [Pro markroche](#): bottom of page 6 top of p 7 in The Lazy Man's Guid to Death and Dying seems to somewhat address this
 - 8:04 [piph](#): thanks all , was late.. where will KD's interview air?
 - 8:04 [silverdale](#): Dosts is Kathlenn on Justin or elsewhere ... what is teh ***?
 - 8:04 [dosts](#): <http://www.blogtalkradio.com/marriahstar/2012/03/22/what-is-wisdom>
 - 8:04 [mollymidway](#): Thanks all, ty dosts
 - 8:04 [simmontemplar](#): same for all the Crowd, Iven and David
 - 8:04 [piph](#): thanks Dosts!
 - 8:04 [Pro markroche](#): what would we be seeing question
 - 8:04 [dosts](#): she'll be talking about her spiritual path and work with EJ
 - 8:04 [muspelspark3](#): thank you all
 - 8:04 [Pro markroche](#): Thanks Iven David and All
 - 8:04 [piandjo](#): thank you everyone--hard to watch,take notes, talk, and read all at the same time! Great comments all.
 - 8:04 [auriah](#): Thank you David and Iven
- » hehe, i agree P, but pushes that attention level!
- 8:06 [bardoman](#): Thanks David...
- » Thanks Iven...
