  - » ok gone now
- 7:01 [Simmontemplar](#): Hello,great to be back with you !!
- 7:02 [Lost horizon](#): Hi, Simmon
- 7:02 [Simmontemplar](#): Hey Dan !! nice seeing you !
- 7:02 [Silverdale](#): Hi - Simmon!!!
- 7:02 [Simmontemplar](#): Silver ! hi there !

- 7:08 **Jim h**: A Work focus
- 7:08 **Pathworld**: i dont understand the question ?
- 7:08 **Jim h**: = my c of g
- 7:09 **Simmontemplar**: Not the habitual pull of desires from the machine but a unified Centre of gravity from the Essential Self-
  - » thank you for expanding the idea lven !!
- 7:11 **Auriah**: my center of gravity that is not from a momentary influence comes from my ability to observe myself, so constantly self monitor and be in a place of presence and attention. I move from a very different place, a different way, more graceful, than when...
  - » I move from a very different place, a different way, more graceful, than when I'm under the momentary influence.
  - » physically for me it is a field of energy that feels more solid around me, and a lightness in my third eye region, a sensing and knowing, observing
- 7:13 **Piandjo**: this new centrum of gravity is for me a presence which is literally above me which descends thru my heart area
  - » it has a disinct vibration that does not change from one experience of it to another.
- 7:14 **Adlucem**: It is the resonance between me and you; the connection between two
- 7:15 **Markroche**: for instance, on a certain level, the earth is a real big centrum of gravity
- 7:15 **Pathworld**: i fine myself getting very frustrated at the moment caus i cant get it
- 7:15 **Piandjo**: yes, adlucem
- 7:15 **Simmontemplar**: I have ...some how begun to differentiate the wills and pulls of the machine; and another that is a will of a defferent nature. That is the beginning of unification that I can feed
- 7:15 **Markroche**: as distinct from a fulcrum leverage point
- 7:16 **Adlucem**: like a tuning fork.
- 7:25 **Simmontemplar**: Centrum of gravity is equal as a Centrum of Stability in the sense that it has always the same purpose; not like the machine's centres
  - » so the former gives us the stability to carry on with our work; the latest doesn't
- 7:26 **Silverdale**: Well said Simmon ...
- 7:26 **Piandjo**: very nice, Simmon
- 7:27 **Vadere**: the centrum of gravity weighs down my choices and actions when i am off course
- 7:27 **Markroche**: 'the objective sensitivity that we create within ourselves' really like that phrasing David, thx
- 7:27 **Simmontemplar**: thanks guys ! with your help I can put something together !
- 7:28 **Silverdale**: You lead ... we follow ...
- 7:28 **Jim h**: Vadere - reminds me of Conscience
- 7:28 **Simmontemplar**: Yes Vadere !
- 7:28 **Markroche**: it was Davids phrase-lol
- 7:29 **Simmontemplar**: let's go together Silver !!
- 7:30 **Silverdale**: Hi Ho Silver!
- 7:31 **Jim h**: The machine does things to pass the time between birth and death.
- 7:31 **Simmontemplar**: huuu, what an idea Jim !
  - » the Self is "a-temporal"
- 7:32 **Jim h**: Mother and Child are One - of one body
- 7:32 **Piandjo**: a rather stunning idea there, Jim
- 7:33 **Simmontemplar**: like the monkey in Toronto's news
- 7:33 **Markroche**: obsessed to the degree that they themselves end up living unbalanced lives
  - » which, ironically, in the long run, is not good for the child either

- 7:34 **Piandjo**: Therapists like to say that you can't love another person if you don't love yourself first. Maybe the same thing holds for us and God.
- 7:35 **Simmontemplar**: makes sense Pi !!
- 
- 7:36 **Adlucem**: I was first aware of being awake when I looked at my baby. The childbirth experience started this path for me.
- 7:37 **Simmontemplar**: Silverdale, I think here we are feeding our "moon", isn't it ?
- 7:37 **Piandjo**: The machine learns how to step aside and give the ES more . earth time
- 7:37 **Lost horizon**: I wondered what a mother's perspective would be about this
- 7:38 **Jim h**: We're growing a Soul - the Mother's Child
- 7:38 **Silverdale**: Yes ... we must tend to the daily necessities of life - feed the moon - while striving to reenter the Great Central Sun ...
- 7:40 **Auriah**: gawd \*\*\*! that was hard, overwhelmed by the "momentary influences"  
» LOL!
- 7:41 **Piandjo**: Lucid, Silverdale.
- 7:41 **Lost horizon**: "Sometimes I feel like a motherless child" takes on a whole new meaning with this chapter
- 7:41 **Simmontemplar**: I hear you Silver
- 7:42 **Auriah**: those kids are all mine, and I am their mother... and if I lose my center, then the class/hour is lost. but the response is amazing when I can stay centered.
- 7:43 **Piandjo**: great observation, Auriah
- 7:43 **Auriah**: the kids respond immediately and with fluidity to that change in vibration  
» i get to be the teacher i am meant to be.  
» ty Pi.
- 7:45 **Jim h**: The irritant that forms a pearl
- 7:46 **Markroche**: it sseems like by creating the diamond the way David described  
» makes us a sort of anomaly of nature  
» and hence 'abrasive'
- 7:47 **Simmontemplar**: Susan: so, here we are reversing the rolls; now we as a little diamond we affect the Absolute. Before the Absolute was affecting us through the power of influence. Correct?  
» although both situations stand at the same time
- 7:47 **Auriah**: @LH: "Sometimes I feel like a motherless child" takes on a whole new meaning with this chapter ... I feel that way too sometimes  
» ty 4 sharing
- 7:48 **Jim h**: Sometimes I am a motherless child
- 7:49 **Piandjo**: abrasives don't just "abrade", they remove what is unnecessary from the matrix so the reflection to the Absolute is clear
- 7:49 **Auriah**: good point Pi
- 7:49 **Piandjo**: ty
- 7:50 **Simmontemplar**: yes Pi, very subtle comment  
» thy Will be done
- 7:51 **Markroche**: you wait with surrender and acquiescence And with readiness
- 7:55 **Auriah**: great! - I don't feel like I'm teaching them much at all sometimes, but they teach me a lot!
- 7:55 **Piandjo**: The word "education " in Latin means " to lead forth".
- 7:55 **Auriah**: working with individual students, I can allow them to direct their learning and provide hallenges to keep their interest growing.  
» nice! thanks PI
- 7:56 **Simmontemplar**: Susan: What would be these "shocks" ? how do these folks can "shock" you?

- 7:57 [Auriah](#): good questions simmon
- 7:57 [Markroche](#): more germane to this discussion and to the technical meaning of educare
- 7:57 [Jim h](#): Somehow see beyond the machine -experience the Being, but how?
- 7:57 [Markroche](#): is 'to lead (or draw) out'.
  - » the idea being more akin to the socratic method, to detective work than to lecture type work
- 7:58 [Simmontemplar](#): yeah , ...come here and plug your fingers in the electric sockets in the wall !
- 7:59 [Auriah](#): LOL simmon
- 7:59 [Simmontemplar](#):
- 8:00 [Susankester](#): simmn- is this answering your question?
- 8:01 [Markroche](#): sometimes i felt some tension within myself and in the interaction
  - » between us, and yet the cooperativeness between us
  - » seemed to create an opening for using the tensions for delving deeper into the subject
  - » yeah, that 'staying in the space' is what i really enjoyed about the process
- 8:03 [Simmontemplar](#): Dan is Lost Horizont?
- 8:03 [Auriah](#): yes
- 8:03 [Piandjo](#): yes, i think
- 8:04 [Simmontemplar](#): I thought so, thanks Auriah and Pi
- 8:04 [Lost horizon](#): You are all seeing Lost Horizon on your screens....
  - » (Iven subbing here)
- 8:04 [Markcirka](#): lol
- 8:04 [Simmontemplar](#): hahah !! that's why !
